Customer Reviews

Insightful and well written. I was a small business lender for a number of years and now teach in a business school. This book presents a comprehensive insider's perspective on the lending industry and clearly communicates the critical things that both lenders and a borrower's need to know to equip

themselves for the lending process. The best part is that this done through a series of accessible yet real world anecdotes taken from the author's extensive personal experience. Great book.

Great information for those considering any type of commercial loan! The years of experience of the author comes through for both sides of the process! A must read.

An exceptional tool/reference guide for all involved in finance!! Very helpful to both, lenders AND borrowers.
